ALL AGREEMENT STATES, MICHIGAN, NEW JERSEY, PENNSYLVANIA, VIRGINIA,
NON-AGREEMENT STATES, STATE LIAISON OFFICERS

MANAGEMENT CHANGE IN THE DIVISION OF MATERIALS SAFETY AND STATE AGREEMENTS (FSME-08-003)

Purpose: To inform the States of a management change in the Division of Materials Safety and State Agreements (DMSSA), Office of Federal and State Materials and Environmental Management Programs (FSME).

Background: In mid December 2007, I announced to FSME management and DMSSA staff my intention to resign from the Nuclear Regulatory Commission and pursue an employment opportunity in the private sector. My resignation is effective February 2, 2008. I have truly enjoyed working on State related issues, place great value on State input, and have found the working relationships which I fostered with State representatives to be most rewarding. Thank you for the support you have shown me in recent years. On February 4, 2008, I will further my career by working on radioactive materials and nuclear fuel issues at the Nuclear Energy Institute, in Washington, D.C. I trust that our paths will cross again on issues of mutual interest.

Discussion: I can assure you that FSME senior management is actively working to identify a qualified manager to lead this Division's important mission of working with the States to address the myriad of radioactive materials issues that we collectively face nationwide. You will be notified when a selection is made. In the interim, Robert Lewis, my current Deputy, will be Acting Division Director. Rob may be reached at 301-415-3567 or RXL1@nrc.gov.
