2009 National State Liaison Officers Conference
Panel Discussion:
Cooperation with State Emergency Response Organization Officials

Allan Barker
Regional State Liaison Officer
Region III
August 19, 2009
The Mechanics ………

- Our Region III Liaison role is to notify the applicable States and FEMA regional duty officers, and if appropriate, the Prairie Island Indian Community.
- Contrary to popular belief, the Federal government does NOT have jurisdiction on a local level to direct public response action.
- The role of the federal government is to provide technical assistance and to augment State and Local resources.
Regional Incident Response

- Determine State EOC level of activation
- Updates made due to incident changes and/or upon request
- Is a State EOC Liaison Leader needed to establish single point of contact?
- Determine contact information of State protective action decision making authority
How About A...........

TEST ??
Test Notification

- Unusual Event has been declared due to an explosion in the protected area. A temporary storage building has physical damage after reports of an explosion in the area.
- Building is located outside any vital area. There are no reports of fire in the area.
- No impact on reactor operation with the unit remaining at 100%. The cause of the explosion is still unknown.
- No offsite assistance from the fire department has been requested, and no personnel injuries reported.
Other Questions........

• What did the temporary storage building contain?
• Where did the debris land?
• Are there similar storage buildings at other locations on site?
• During the notification was there an additional question that should have been asked?
Cooperation is built from……

- Creditability – a “single” point of contact for the state with the support of the agency.
- Being sensitive to the State’s audience.
- Communicate in a tone that delivers the significance of the incident.
- Do NOT Speculate or Assume.
- Prepare for the next logical question.
- Communicate factual information when learned.
THANKS

APPRECIATION TO THE PARTICIPANTS OF THIS PANEL AND TO THE SLO AUDIENCE FOR YOUR INVOLVEMENT
